Topic

Housing Development

Submission

I hope that housing development will be done together with supporting infrastructure as new shops, school places, GPs and road markings as at the moment we are getting new houses without anything new around them to support extra population.

Topic

Community Development (incl. sports facilities & schools, etc.)

Submission

as per Housing Development comment: I hope that housing development will be done together with supporting infrastructure as new shops, school places, GPs and road markings as at the moment we are getting new houses without anything new around them to support extra population

Topic

Land Use Zoning / Specific Local Objectives / Land Use Zoning Map

Submission

Regarding "Map No. 1 Land Use Zoning Objectives" - great to see open space under SLO8 and active open space under SLO02, close to town center, instead of building new houses and apartment everywhere (especially if there is plenty of space not too far away).
Everything else on the maps looks quite good as well.

Topic

Strategic Flood Risk Assessment / SFRA Map

Submission

██████████ Deerpark Court which is in the flood zone I don't understand how it was possible to build residential units here (the same as other estates in the flood zone). I hope that new developments will not increase flood risk and that appropriate measurements will be taken to protect existing residential buildings.

Topic

Any other issues

Submission

Poor road markings around Town Centre, especially near Dunnes Stores - it's very dangerous and confusing, especially for tourist and visitors.

It took Wicklow County Council 5 or more years to have something done this and the markings are starting to look bad again.

No one cares as the roads are managed by some Management Company (outsourced by Wicklow Co Co?).
