## Topic

Tourism Development / Greenway Supporting Infrastructure Map

## Submission

I am not sure what is exactly happening with the extended Greenway around the lake but would like to voice my support of it's creation. The extension will initially cause some disruption but long term it will allow more people to engage with nature and they will then be more likely to want to protect it.

## Topic

Community Development (incl. sports facilities & schools, etc.)

## Submission

I live in Blessington and with it's growth, I would like to see the following developments in sports facilities:

Land to be designated in Blessington for a 400 meter track and associated facilities. This would be a facility that would be available to all the community members including clubs and schools and would also benefit the rest of West Wicklow.

A public swimming pool, there's no public pools in West Wicklow still.
