LAP - Proposed Material Amendments No 14 Submission

Submission

Hi There

I'm unsure if i clicked into the correct amendment

We have been asking the council, road safety authorities and politicians for several years now to put a pedestrian crossing on church street, as vulnerable have no way of crossing the road safely due to the existing format of it. This is an ongoing issue and we are trying to help people become more independent as well as being safe in their local community

The area at the corner beside wardrobe could easily be a pedestrian crossing

We await your reply and hope it can have some postivie results this time.
