## Topic

Overall Vision and Strategy of LAP

### Submission

I don't see any mention around accessibility for people with limited mobility ie specifically wheelchair users. Wicklow Town and surrounding area lacks appropriate wheelchair accessibility and offers limited resources for wheelchair users. I would like to see this covered as part of the overall visional and strategy.

Secondly, a greenway for the area would be a huge boost to the quality of life. This should be included as part of any future plans ....

## Topic

Tourism

### Submission

The lack of a marquee hotel in Wicklow Town is a major gap to tourism. It would be good to see plans around accommodation of tourists in the Wicklow Town area.

## Topic

Transport Assessment / Transportation Strategy Map

### Submission

The vast new housing development of the area needs to have a corresponding transport investment - the N11 is already over capacity at peak times and badly needs a third (3rd) lane in both directions already. Public transport such as extending the DART line to Wicklow Town is already long over due.... bus is not the long term solution to the transport issue
